

Removable Rumble Strips

Improve Safety In The Work Zone With ATM Rumble Strips

Speeding and inattentive driving are the top causes of crashes in the work zone. ATM Removable Rumble Strips alert drivers and slow traffic without the added time and expense of installing thermoplastic, asphalt, or grooved rumble strips.*

* Wis, DOT, and S&C Research, 1996

Get Attention

Rumble strips alert motorists of a change in traffic pattern and draw attention to caution signs or road construction.

- **Visual** – The bright, orange color is highly visible to attract attention to the road.
- **Audible** – Repeating rumble sound from strategically-placed rumble strips keeps attention focused on the road as a continued warning system.
- **Physical** – Vibration of the wheel in conjunction with the rumble sound increases work zone awareness. The vibration can be intensified by double-stacking the 150 mil strips for a total thickness of 300 mils.

Improve Worker Safety

Quick installation and removal reduces the amount of time workers are exposed to dangerous traffic conditions.

Save Labor Costs

No special equipment is required. Installation and removal takes less time and fewer workers than traditional rumble strips.

Removable Rumble Strips

Strips Are Durable! – ATM Rumble Strips have a pressure-sensitive backing that creates a secure bond to the asphalt. When installed to a clean, dry surface, ATM Rumble Strips will remain in place throughout the duration of the project.

Installation Is Easy! – ATM Rumble Strips install in three easy steps. Just clean the area, position the strips, and tamp them down. The roadway can be opened to traffic immediately.

Removal Is Fast & Clean! – Removal of ATM Rumble Strips will not damage the road surface – simply peel the strip off and discard. No clean-up, no repairs!

Order Now! – Rumble strips are 4" wide, 150 mil thick, and ship in 90' rolls. Available in orange, black, white, or custom colors*. Also available for permanent application.

Rumble Strips
